OPENING NIGHT · DROP-IN BOOTH · 2-PART CARBONLESS (NCR) A4 · ONE PER VISITOR

DE PAPIEREN MACHINE · YOUR SIXTEEN WORDS

EXCERPT No. _____

FIRST NAME _____ TIME _____

1

PICK AN EXCERPT. Any one from the rack. A Dutch newspaper printed before 1880 — this is a copy, the original is safe in the building.

2

READ ONLY THROUGH THE SLOT. Left to right, top to bottom, never back. One word per cell. **You decide what counts as a word.**

3

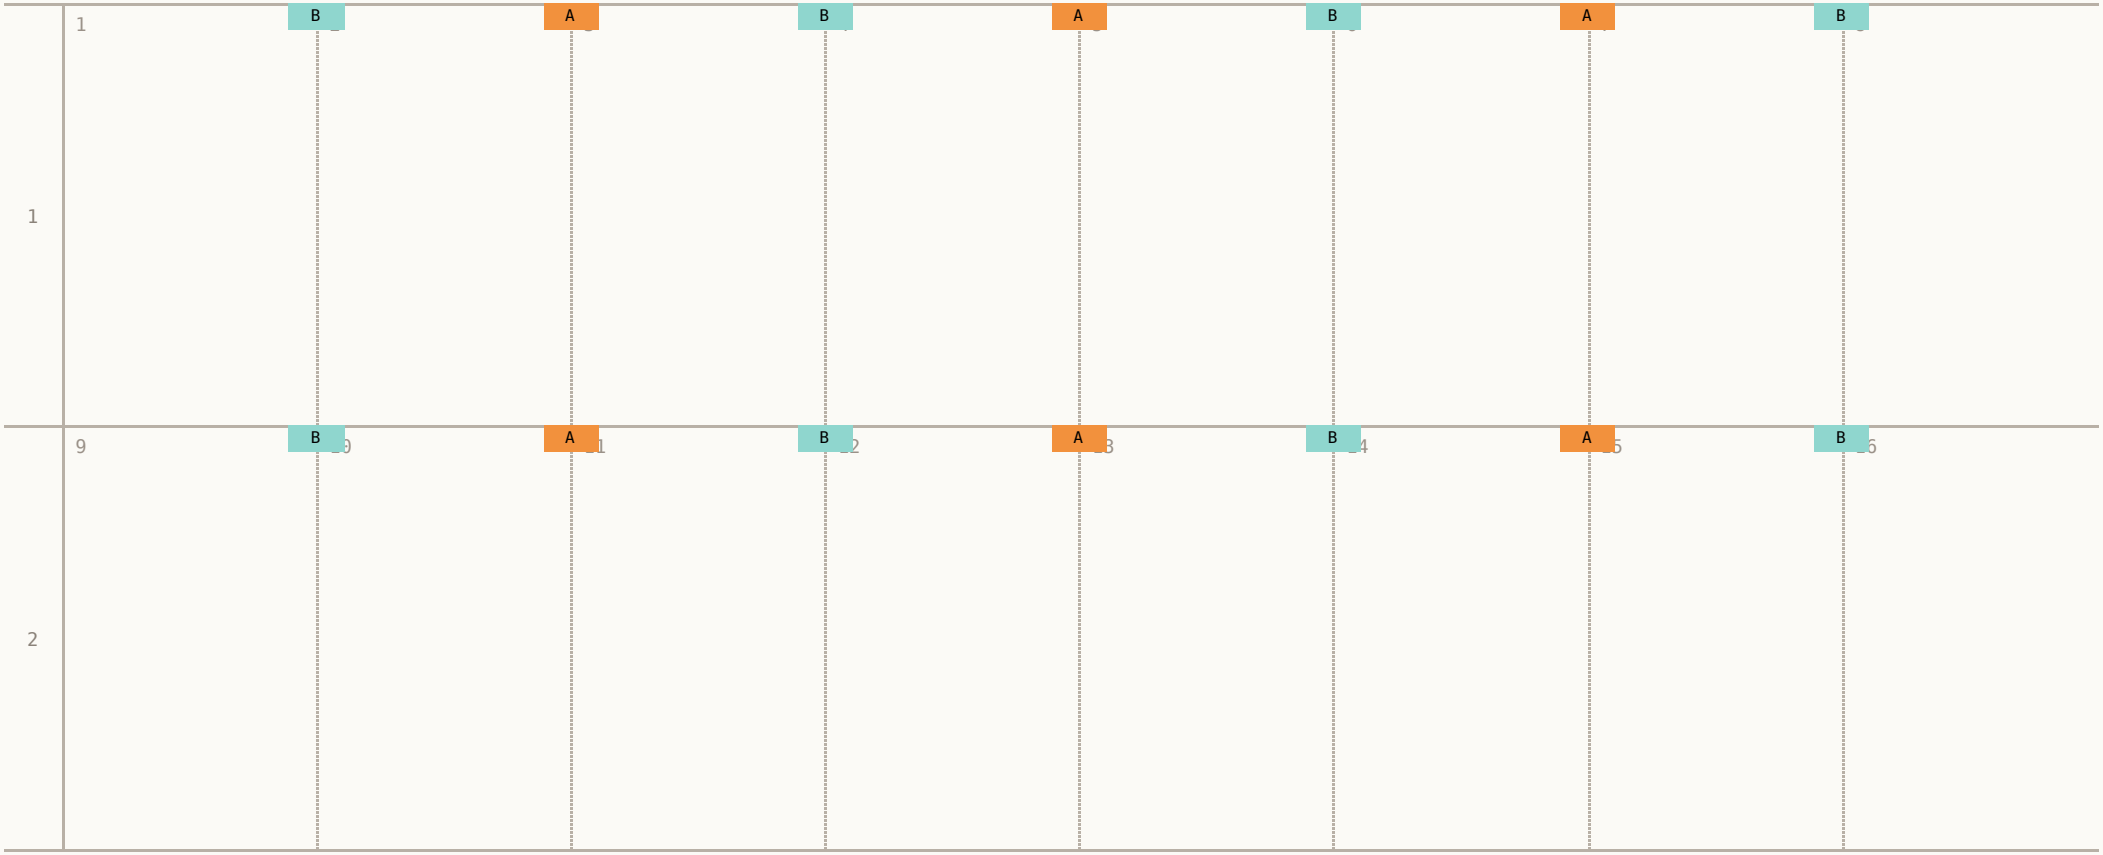
DO NOT FIX MISTAKES. Press hard — there is a copy underneath. Sixteen cells is about three minutes. Fewer is fine.

4

CUT ON THE COLOURED MARKS, then file every pair on the big board. You have just fed the machine.

5

FOUR SCRAPS CANNOT GO IN. Take one to the pink line and write why it was left out. **The machine runs on the hour.**



CUTTING: TOP COPY → cut at A only → pairs 1+2, 3+4, 5+6, 7+8 …
CARBON COPY → cut at B only → pairs 2+3, 4+5, 6+7 …
Cut between the two rows as well. **File every pair under its FIRST word.**

16 CELLS → 14 PAIRS IN · 4 SCRAPS OUT · 1 TRANSITION IMPOSSIBLE. The four offcuts are single cells left over from the carbon copy — real paper you can hold and hang. The impossible one is word 8 → word 9: they sat side by side as you read, but they are on different rows and no scissors will make them one piece. Not a scrap, an absence.

EVERY WORD THIS MACHINE SAYS TONIGHT PASSED THROUGH SOMEBODY'S HAND IN THIS ROOM
